

# Public Consultation on the development of a comprehensive, integrated Research, Innovation, and Competitiveness Strategy for the Energy Union

Fields marked with \* are mandatory.

## Introduction

---

### Objective of the consultation

The objective of this public consultation is to collect the opinions of stakeholders and interested parties, including EU citizens and private and public organisations, with regard to the development of a comprehensive research, innovation and competitiveness strategy for the Energy Union, as the fifth pillar of the Energy Union Communication ([http://ec.europa.eu/priorities/energy-union-and-climate\\_en](http://ec.europa.eu/priorities/energy-union-and-climate_en)). This aspect is particularly important given the objective to drastically reduce EU's emissions and use of energy, while at the same time maintaining the competitiveness of economic sectors including energy and transport but also industry, agriculture/bioeconomy and construction, and providing modern, user-friendly, safe, sustainable and secure solutions to EU citizens and businesses. In this sense, this strategy will provide an important element to contribute from the EU perspective to the Paris Agreement achieved on last 12 December 2015 as the outcome of Conference of Parties (COP21) under the United Nations Framework Climate Change Convention (<http://unfccc.int/resource/docs/2015/cop21/eng/l09r01.pdf>).

The replies submitted to this public consultation will be analysed, aggregated for specific sectors and taken into consideration during the development of an Integrated Energy Union Research, Innovation and Competitiveness Strategy foreseen for end of 2016.

More targeted consultation processes of specific stakeholders for the energy and the transport area will also be put in place through existing fora, such as the Technology Platforms, and through the establishment of Expert groups. These specific consultations will provide inputs to how the on-going Integrated Strategic Energy Technology Pan (SET-Plan)[2] and the idea for a Strategic Transport Research and Innovation Agenda (STRIA)[3] should be seen in the context of an overall Integrated Energy Union Research, Innovation and Competitiveness Strategy.

## Background

Research and Innovation are paramount to achieve the objectives of the Energy Union. They underpin its four first dimensions— decarbonisation, energy efficiency, energy security, and a fully integrated internal energy market – since Research and Innovation aim to provide solutions to challenges faced in each of them.

Over the last decade Europe has steadily progressed toward its 2050 goal ( [http://ec.europa.eu/clima/policies/strategies/2050/index\\_en.htm](http://ec.europa.eu/clima/policies/strategies/2050/index_en.htm)) of a largely decarbonised continent. As the transformation of its main economic sectors advances, it has become apparent how the challenges ahead have become more complex and interlinked. Achieving greater levels of decarbonisation and decoupling EU economic growth from increased emissions will require profound technical, economic and societal changes. But a change of gear in the development and deployment of new solutions alone will not be sufficient. The transformation of a complex system, fostering the cooperation among different sectors while taking into account the increasingly limited natural resources at our disposal will be crucial.

The Energy Union vision provides the framework to respond to these challenges. It is built on a set of climate and energy targets to be realised by 2030 ( [http://ec.europa.eu/clima/policies/strategies/2030/index\\_en.htm](http://ec.europa.eu/clima/policies/strategies/2030/index_en.htm)): at least 40% domestic reduction of greenhouse gas emissions, at least 27% share of renewable energy consumed in the EU and at least 27% improvement in energy efficiency. Reaching and exceeding these intermediary objectives will allow the EU to pursue the goal of a 80-95% decrease in greenhouse gas emissions by 2050.

Where targets indicate the pace and ambition of the change, a clear strategy specifying the modalities of the (re)evolution is needed as well. In this regard the Energy Union Communication highlights the central role that Research and Innovation (R&I) will play in realising this transformation. It identifies the economic sectors that are called to provide the greatest contribution.

An overarching Integrated Energy Union Research, Innovation and Competitiveness Strategy is essential in order to ensure that the overall goals are not lost in the trade-offs between the individual sectors. New e-mobility solutions for reducing CO<sub>2</sub> in transport cannot result in transferring the problem to the energy sector if there the electricity supplied does not come from clean sources. Exploiting the potential of biomass for energy cannot result in the unsustainable use of natural resources or jeopardising food security or raw materials availability for industrial products.

Research and innovation shall contribute to make Europe the world's number one in renewables & low-carbon technologies and solutions as well as to maintain and reinforce a strong and competitive industrial base.

Although technological development and innovation are at the core of the transition to a low carbon economy, the deployment of innovative solutions depends on factors such as new approaches to investment, carbon pricing, a favourable business environment that supports new and even disruptive businesses and innovation-friendly regulatory frameworks.

Efforts are also necessary to effectively engage Member States, local authorities, stakeholders and consumers to allow this transition to take place and move forward societal and economic growth. For this reason, partnerships and close cooperation with key players around common objectives of public interest is mandatory as well as the alignment of strategies and resources at European, national and regional level.

[1] COM(2015) 80.

[2] C(2015) 6317 final

[3] As announced in the Energy Union Strategy Communication COM(2015) 80, the STRIA contribute to the attainment of the Energy Union goals, and in particular of the goals under the dimension of an Energy Union for research, innovation and competitiveness, by supporting the development and deployment of key low carbon transport technologies.

### **Instructions for completing the questionnaire**

Please note that the questionnaire consists of six parts.

Part I asks for information about the respondent and some questions in Part I are mandatory.

Part II asks to you as general public what efforts should be prioritised for achieving the energy and climate targets.

Part III asks focused questions on aspects of research, development and innovation elements important for the transformation of the specific sector of your interest or activities. In replying to this part, you should take into consideration the specific field of your activity, for example if that is "energy", the "security" challenge to be faced should be read as "security of energy".

Part IV asks questions on aspects of integration elements that should support an integrated strategy.

Part V asks focused questions on aspects of competitiveness of EU economic actors and new business opportunities.

Part VI will allow you to share any other thoughts or comments.

### **Disclaimer**

Please note that this document has been drafted for information and consultation purposes only. It has not been adopted or in any way approved by the European Commission and should not be regarded as representing the views of the Commission. It does not prejudice, or constitute the announcement of any position on the part of the Commission on the issues covered. The European Commission does not guarantee the accuracy of the information provided, nor does it accept responsibility for any use made thereof.

## **Part I - Information about the participant**

---

\*

Please provide your name (first name and surname)

Aurélie Portalier

Please provide your email address

aurelie.portalier@cercleindustrie.eu

\*1. In what capacity are you completing this questionnaire?

- As a private individual
- On behalf of a research and development institute
- On behalf of a university
- On behalf of a micro, small or medium-sized enterprise
- On behalf of a large enterprise
- On behalf of a business association
- On behalf of a non-governmental organisation (NGO)
- On behalf of a standardisation organisation
- On behalf of an interest group organisation / association (e.g. trade union, consumer association)
- On behalf of a national public authority
- On behalf of other public administration
- Other – please specify below

Please specify your economic sector:

- Manufacturing
- Construction
- Infrastructure
- Consultancy
- Agriculture
- Utilities
- Mining
- Insurance or banking
- Data/information provider
- Other

\*

2. Please specify your main field of interest:

- Energy
- Transport
- Buildings
- Agriculture / Bioeconomy
- Manufacturing
- More than one of the above
- Other

please specify:

Cercle de l'Industrie is cross sectoral association encompassing energy - industry - utilities - construction, etc.

\*

3. Please indicate your country of residence:

France

4. Please indicate the relevant country or countries of operation

EU-wide  
Other, non-EU Member State

Please specify the non-EU Member State

Member companies operate all over the world.

5. What is the name of your company/organisation/association or authority?

Cercle de l'Industrie

6. Is your organisation registered in the Transparency Register of the European Commission?

- Yes
- No

Please indicate the identification number

60974102057-03

The Transparency Register of the European Commission is accessible on:

[http://europa.eu/transparency-register/index\\_en.htm](http://europa.eu/transparency-register/index_en.htm)

Please note that received contributions, together with the identity of the contributor, may be published on the Internet, unless the contributor objects to publication of the personal data on the grounds that such publication would harm his or her legitimate interests. In this case the contribution may be published in anonymous form.

\*

7. Please indicate your preference for the publication of your response on the Commission's website:

*Note that whatever option is chosen, your contribution may still be subject to requests for 'access to documents' under Regulation 1049/2001[1]*

- My contribution can be published including my personal information / name of my organisation
- My contribution can be published anonymously
- My contribution cannot be published

Explanations about the Protection of Personal Data are available on:

[http://ec.europa.eu/geninfo/legal\\_notices\\_en.htm#personaldata](http://ec.europa.eu/geninfo/legal_notices_en.htm#personaldata)

The policy on "protection of individuals with regard to the processing of personal data by the Community institutions" is based on Regulation (EC) N° 45/2001 of the European Parliament and of the Council of 18 December 2000.

## Part II - Questions to the general public about priorities for reaching the EU energy and climate targets

---

The transition to an economy based on low-carbon technologies, products and services will only succeed if citizens are convinced of their purpose and use and will be ready to pay for such novel technologies[1] through upgrades to the energy system and the purchase of more energy efficient appliances, vehicles and buildings, also leading to energy and cost-savings in the long run. The questions below are aimed at identifying the priorities of citizens for the transition towards a low-carbon economy.

[1] The Communication on the Low Carbon Roadmap COM (2011)112 estimated the needs to an additional investment of around 1.5% of EU GDP per annum on top of the overall current investment representing 19% of GDP in 2009. It also found that unlocking the investment potential of the private sector and individual consumers presents a major challenge. While most of this extra investment would be paid back over time through lower energy bills and increased productivity, markets tend to discount future benefits, and disregard long-term risks. A key question is, therefore, how policy can create the framework conditions for such investments to happen, including through new financing models.

1. How important in your view is the role of the actors below in reducing societal impact on the climate *rank from most important role down to least important role*

	Most important	Quite important	Partially important	Least important
Individual citizens	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Government	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Industry	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Research institutes	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

2. Who should be the main financial contributor for investments into research, innovation and deployment of low-carbon energy solutions and services?

- Everybody (via energy bills) should pay their share as we are all affected by climate change
- Government (via taxation)
- Industry

3. Would you be willing to pay a temporary increase on your energy bill in order to support more research and development into clean energy and more efficient solutions to reduce greenhouse gas emissions?

- Yes
- No
- No opinion

4. Which of the measures below would you consider as priority to allow you as a citizen to contribute to the transition towards a low-carbon economy?

*rank from most important priority= 6 down to least important priority = 1*

	6 = Most important	5	4	3	2	1 = Least important
Being offered alternative public transport solutions for urban areas	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Being offered the choice for a more energy efficient car, even if it might cost more	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Being offered the choice for more efficient energy appliances, even if they cost slightly more	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Being offered the opportunity to switch to a green energy provider for my home at the same price I pay today	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Being offered an economically interesting opportunity to install solar panels, a geothermal system or another green energy source for my home at the next renovation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

## Part III - Questions on the broader EU Research and Innovation challenges

---

The Energy Union calls for the development and widespread deployment of innovative technologies and services to increase energy efficiency and reduce greenhouse gas emissions, and support the transition towards a competitive, low-carbon economy. This requires a strategic Research and Innovation agenda aimed at fostering innovative specific technologies, solutions and services, adequate infrastructure as well as converging policies and behavioural changes, across the different economic sectors, namely in the energy, transport, industrial processes, agriculture / bioeconomy sectors.

This part of the questionnaire aims to address the broader challenges regarding research, development and innovation and identify the aspects that are the most important ones for the transformation of the different sectors that are contributing to the Energy Union strategy.

You should indicate how urgent each of the proposed challenges are for your specific area/activity, as you have indicated in Part I - Question 2.

1. What are the most urgent challenges regarding research and innovation that the EU has to face in the future to address the low carbon economy transformation?

*Please select maximum 2 very urgent and 2 quite urgent challenges.*

	Very Urgent	Quite Urgent	Partially Urgent	Not so Urgent	No opinion
Dependency on fossil fuels	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Reduction of greenhouse gas emissions	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Reduction of other pollutants emissions	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Infrastructure development	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Safe utilisation of innovative solutions	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Security (cybersecurity, protection from abuse)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Expertise and skills availability	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Internalisation of external impacts/costs	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Competition from third countries	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Technological advancement	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Availability of raw materials / competition over their access	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Reduction of operating costs	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Progress on enabling technologies	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Solutions to cater for demographic changes	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Societal transformation and acceptance of innovative solutions	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
User behaviour / awareness	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Accessibility of innovative solutions	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Availability and reliability of products and services	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Affordability of innovative solutions	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Better product design	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Better manufacturing processes	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Please explain any of your choices above or specify your choice of "other" ?

2. What are the most urgent objectives for which innovative technologies should be urgently encouraged?

*Please select maximum 2 very urgent and 2 quite urgent challenges.*

	Very Urgent	Quite Urgent	Partially Urgent	Not so Urgent	No opinion
Increasing efficiency of primary energy production	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Increasing efficiency of energy/fuel for transport (incl. smart grid)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Reducing energy intensity in agriculture	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Reducing energy intensity in buildings	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Reducing energy intensity in heating/cooling/lightning systems	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Reducing energy intensity in business and administrative buildings	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Reducing energy intensity in the overall transport system (including freight and passengers)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Reducing energy intensity in use of individual means of transport (vehicles, vessels)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Reducing energy intensity in manufacturing	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Minimising environmental footprint of energy production, notably of low-carbon producing energy sources	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Increasing storage capacity and performance	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Increase general life cycle of products and recyclability	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Increase specific life cycle of products and recyclability of energy-related products (solar panels, batteries, etc.)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Develop and deploy competitive new alternative fuels for transport (incl. hydrogen)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Develop more efficient / lighter / cheaper batteries for electrification of transport	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Develop forests and other methods of carbon storage	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Develop technologies for re-use of carbon	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other – please specify below	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Please specify your choice of "other"

3. Please rate the importance of the following elements for a future transport system that is environmentally friendly and responds to the needs and wishes of citizens and businesses

*Please select maximum 3 very important and 4 quite important challenges.*

	Very Important	Quite Important	Partially Important	Not so Important	No opinion
Environmentally friendly and user responsive road transport	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Environmentally friendly and user responsive urban mobility	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Environmentally friendly and user responsive aviation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Environmentally friendly and user responsive inland waterway transport	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Environmentally friendly and user responsive maritime transport	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Environmentally friendly and user responsive rail	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Environmentally friendly and user responsive logistics	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Connected and automated transport	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Smart mobility services (e.g. shared cars rather than individual ownership)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Electrification of transport	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other alternative fuels for transport (such as hydrogen or biofuels)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Safe and secure transport	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Better infrastructure for transport	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Being ready for possible effects of climate change (weather phenomena, rising sea level)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
General social and behavioural aspects	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Social innovation and achieving behavioural changes	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Cheap transport	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Demographic changes in EU	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other – please specify below	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Please specify your choice of "other"

Cercle de l'Industrie, like Afep, with whom it is answering jointly to this consultation, are cross-sectoral associations; they do not wish to answer question 3 because it is considered as not enough focused on issues of general interest.

4. How much importance should be given in the Research and Innovation strategy to technology development to pursue climate-related objectives ?

*Please select maximum 2 very important and 2 quite important challenges.*

	Very Important	Quite Important	Partially Important	Not so Important	No opinion
Research on climate science	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Risk management	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Research on impact of climate change on agriculture	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Research on adaptation to new climate conditions, notably for crops, (transport) infrastructure, spatial planning	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Research on impact of climate change on environment and biodiversity and health	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Research on mitigation measures	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Research on economic modelling	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
International cooperation with and technology transfer to most affected countries	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other – please specify below	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Would you like to explain any of your choices above or specify your choice of "other"?

5. In the field of your own specific activity / work area as indicated in Part I, Question 2, what are the most important trade-offs to be addressed to achieve the low carbon economy transformation?

6. In relation to the specificity of your own activity / work area, Research and Innovation at EU level should:

*Please select maximum 2 very important and 2 quite important challenges.*

	Very Important	Quite Important	Partially Important	Not so Important	No opinion
Mobilise significantly more public funding and investments	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Mobilise significantly more private investments	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Put greater emphasis on financial instruments such as risk capital, loans and guarantees	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Support innovative projects so that they can achieve large scale deployment	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Focus greater support to basic research	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Focus greater support to innovation and bringing to the market innovative solutions	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Focus much more on social and behavioural aspects	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other – please specify below	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Please explain any of your choices above or specify your choice of "other" ?

7. At EU-level, support to Research and Innovation in the specific sector of your activity (*please select only 1 option*):

- needs to address all technological approaches/solutions, spreading the available financial support
- needs to identify ways to focus on fewer specific technologies to ensure that most promising technologies can make it earlier to the market
- needs to be driven by political choices
- needs to focus more on addressing underlying societal needs and less on technologies/solutions
- other / no opinion

Please explain your choice above or specify your choice of "other":

With Afep, Cercle de l'Industrie believes that research and innovation subjects must be based on the conclusions of the European technological platforms. Furthermore subsidies cannot be granted to mature technologies.

## Part IV - Questions on the development of an integrated strategy for Research and Innovation

---

1. In relation to the development of an EU integrated strategy for Research and Innovation across sectors to address the low carbon economy transformation, what in your view are the most effective aspects to be promoted?

*Please select maximum 2 very effective and 2 effective aspects*

	Very Effective	Quite Effective	Partially Effective	Not so Effective	No opinion
Multidisciplinary R&I activities across sectors for new technologies / solutions	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Enabling technologies (ICT, materials, biotechnology, nanotechnology etc.) that can help all relevant sectors	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Development of standards/interfaces that enable better deployment within the different sectors	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Development of standards/interfaces for cross-sectorial applications	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Feasibility studies & demo activities across sectors for integrated approaches	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Cooperation among different stakeholders, public authorities, operators, users across sectors	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Cooperation amongst different European regions to develop European value chains on the basis of complementarities between regional specialisation strategy	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Preventing and limiting trade-offs between objectives / results	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

2. Please rate the importance of the following elements supporting the emergence of an EU integrated strategy for Research and Innovation to address the low carbon economy transformation?

*Please select maximum 2 very important and 2 important elements*

	Very Important	Quite Important	Partially Important	Not so Important	No opinion
Shared long-term vision across different sectors activities	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Stakeholder engagement	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Elimination of fossil fuel subsidies	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Public acceptance	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Viable technologies	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Safe and sustainable technologies	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Adequate regulatory framework	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Availability of suitable infrastructure as enabler to the deployment of innovative solutions	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Availability of R&I funding	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Strong partnerships among private and public sector	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

## Part V - Questions regarding the means to seize as many business opportunities as possible from the deployment of innovative, affordable and low carbon solutions inside and outside the EU

---

This part of the questionnaire will address the barriers and means to seize as many business opportunities as possible from the deployment of innovative and affordable low carbon solutions (technologies, products, services), inside and outside the EU. Estimations of the size of these global markets range from about €1,600 billion[1] to €4,400 billion[2], with high growth potentials in the main relevant sectors: power generation and distribution, industry (manufacturing and construction), residential and services (buildings or built environment), transport and agriculture.

Europe is still highly competitive with European businesses offering these products on the global market, in which the EU share can be estimated at around 28%. However, the EU risks losing its comparative advantage without a comprehensive strategy, which brings together supply, demand and regulatory aspects to allow the exploitation of innovation-based business cases. In addition, businesses are facing increasing challenges to invest in new low carbon solutions to modernise their installations and processes in Europe.

1. How important are the following areas of actions to ease the **deployment in EU** of innovative and affordable low carbon solutions either provided by the EU or by the rest of the world?

*rank from most important role = 6 down to least important role = 1*

	6 = Most important	5	4	3	2	1 = Least important
Better regulatory framework	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Better financial environment for new investments	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Better technology development, including standards	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Better market incentives	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
Higher public acceptance	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Other	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

2. How important are the following areas of actions that would unlock the potential for growth and jobs in Europe through the **domestic supply of EU low carbon solutions**?

*rank from most important role =5 down to least important role =1*

	5= Most important	4	3	2	1= Least important
Better regulatory framework	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Better financial environment for new investments	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Better technology development, including standards	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Better market incentives	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
Other	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

3. How important are the following areas of actions to reinforce the **exports of EU low carbon solutions?**

*rank from most important role =5 down to least important role =1*

	5 = Most important	4	3	2	1 = Least important
Better regulatory framework	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
Better international cooperation	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Better technology development, including standards	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Better promotion of EU exports	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

4. To strengthen the competitiveness of EU low carbon solutions, how important is it to reinforce synergies between the Energy Union and other EU initiatives/policies ? *Please select maximum 2 very important and 2 quite important answers.*

	Very Important	Quite Important	Partially Important	Not so Important	No opinion
Synergies with the Investment Plan for Europe	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Synergies with the Single Market	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Synergies with the Digital Market	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Synergies with the Circular Economy	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Synergies with other sustainable policies	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Synergies with Trade policies	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Synergies with industrial policy	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Others	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

[OPTIONAL] Would you like to explain any of your choices above by specifying the synergies to be reinforced or specify your choice of "Others"?

## Part VI - Other questions

---

[OPTIONAL] Any other comments or advices you would like to share on research, development or innovation or on industrial competitiveness?
